

From Data Chaos to Data Superpowers

- OLAP & Data Cubes help organizations transform massive data into useful insights.
- Interactive question: How would you find why profits are falling?

The Case of the Missing Sales Profit

- Sales are growing but profits are dropping.
- Analyze by city, product, and time to identify the root cause.

OLAP: The Data Detective

- OLAP (Online Analytical Processing) enables fast multidimensional analysis.
- Used in retail, banking, healthcare, and e-commerce.

The Superhero Data Cube

- A Data Cube stores data across dimensions such as Product, Location, and Time.
- It enables quick comparisons and trend analysis.

OLAP Superpowers

- Slice: View one dimension.
- Dice: View selected data.
- Drill Down: More detail.
- Roll Up: Summary view.

Turning Data into Decisions

- Benefits: Faster reporting, better decisions, trend discovery, and competitive advantage.
- Quote: Data is the new oil; OLAP is the refinery.
